DETAILED ACTION

Notice to Applicant

1. This communication is in response to the Telephonic Interview held on 4/02/08 with Attorney Edward J. Howard. Claims 2, 7-17 and 18-22 have been cancelled. Claims 1, 3-6 are pending.

EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Attorney Edward J. Howard on 04/02/08. During the interview Attorney agreed to the followings:

In the Claims:

Cancel claim 18.
Cancel claim 21.

In the Title:

Method ~~and system~~ for issuing insurance underwriting instruments

Allowable Subject Matter

4. Claims 1, 3-6 are allowed. The following is an examiner's statement of reasons for allowance and in light of Applicant's arguments.

Independent claim 1 is directed to "automatically calculating a premium for the at least one fidelity or surety bond to be issued based on the input data and the underwriting data in response to a request therefore; storing data indicative of images of a plurality of pre-defined bond forms so as to be accessible by said at least one computer processor; selecting a sub-set of the data indicative of images of a plurality of pre-defined bond forms dependently upon the inputted data; and automatically rendering the at least one fidelity or surety bond to be issued using said data indicative of bond customers, said selected data indicative of images of a plurality of pre-defined forms, and calculated premium in response to a request therefore; wherein data indicative of said insurance underwriting instrument is automatically stored so as to be accessible to said at least one computer processor".

The closest prior art of record, Luchs et al. (4,831,526) discloses computerized insurance premium quote request and policy issuance system.

Bosco et al. (5,191,522) discloses integrated group insurance information processing and reporting system based upon an enterprise-wide data structure.

Sforzo (7, 194,435) discloses computerized method, apparatus and system for issuing surety bonds.

However, none of the prior art fairly teaches/suggests "automatically calculating a premium for the at least one fidelity or surety bond to be issued based on the input data

and the underwriting data in response to a request therefore; storing data indicative of images of a plurality of pre-defined bond forms so as to be accessible by said at least one computer processor; selecting a sub-set of the data indicative of images of a plurality of pre-defined bond forms dependently upon the inputted data; and automatically rendering the at least one fidelity or surety bond to be issued using said data indicative of bond customers, said selected data indicative of images of a plurality of pre-defined forms, and calculated premium in response to a request therefore; wherein data indicative of said insurance underwriting instrument is automatically stored so as to be accessible to said at least one computer processor", as recited in claim 1 above.

Claims 3-6 incorporate the features of claim 1 through their dependencies, and are also allowed for the same reasons given above.

5. The drawings filed on 12/15/00 have been approved by the Examiner.
6. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
